

building student success

san juan college annual report 2005

building for student success

San Juan College's original campus buildings were constructed in the early 1970s when student enrollment was about 800. Today, 30 years later, more than 9,000 students take classes each semester, and that's just the people taking classes for credit. The library and cafeteria are bursting at the seams trying to accommodate more students, community groups, school children and business people.

Construction began on the Learning Commons (rendering shown here) in February 2005. When complete it will add more than 32,000 square feet to campus, addressing not only an increase in student population, but also a change in student expectations and emphasis on learning styles. The new concept places learning at the center of all activities and views students as full partners in the learning process. The center is expected to be complete in December 2005, with move-in March 2006.

Since becoming independent in 1982, San Juan College has seen student enrollment grow by 365 percent.

the president

In this Annual Report, San Juan College celebrates the successes and accomplishments of students in meeting challenges and overcoming hurdles. The College continues to work to accommodate growth and increases in student enrollment while showcasing the diversity of students working to change their lives and impact their community. Since becoming independent in 1982 San Juan College enrollment has increased by 365 percent. With the completion of a \$10.7 million bond election, campus projects will continue to provide a vital and thriving educational facility for students. This report reflects the progress the College has made in becoming a leading edge community college while highlighting students who have paved their way to success.

A handwritten signature in black ink that reads "Carol J. Spencer".

Dr. Carol J. Spencer
President, San Juan College

Dr. Spencer and Dr. Steven Gamble, president of Eastern New Mexico University, sign a memorandum of understanding, allowing ENMU to offer degrees on campus starting in January 2005.

the board

Evelyn B. Benny, member since 1997.
Community service coordinator, Huerfano
Chapter House. Represents district 2.

Don Carlson, member since 2001. Retired
chief executive officer, San Juan Regional
Medical Center. Represents district 7.

R. Shane Chance, member since 2004.
Small business owner. Represents district 6.

Steven S. Dunn, member since 1995.
Operations manager, Merrion Oil and Gas.
Represents district 3.

Eva B. Stokely, member since 1987.
Retired educator. Represents district 1.

D. Craig Walling, member since 1999.
Retired plant manager, Four Corners Power
Plant. Represents district 5.

Edward Wood, member since 1975.
Municipal judge. Represents district 4.
Retired from board June 2005.

More than 14,000 people attended classes at San Juan College during the 2004-05 school year.

board happenings

Board member Don Carlson was inducted into San Juan Regional Medical Center's Legacy of Leadership Hall of Fame. Carlson served as SJRMC's president/CEO from 1987 to 1999, where he dramatically improved care and instilled a strong sense of pride in a "hometown hospital."

San Juan College graduate and Aztec accountant R. Shane Chance was appointed to the San Juan College board to fulfill the unexpired term of Sidney C. Martin, who retired in the fall 2004. He was elected to the position in March 2005 to carry out the remaining two years of the six-year term. He earned an associate's degree from San Juan College in 1991 and

his bachelor's in accounting from New Mexico State University.

On October 15, 2004, San Juan College board and employees gathered to thank retiring board member Sidney C. Martin for his 21 years of service. As the former San Juan County treasurer, Martin brought years of financial expertise to board decisions.

In June, long-time board member Edward Wood retired from 30 years of service. The College gathered to thank him at a reception in September 2005. When Mr. Wood first came on the governing board in 1975, there were a little less than 800 students enrolled.

Sid Martin and his wife Avis received a festive send off from College employees and president Dr. Carol Spencer. (photo top left)

Board member Don Carlson accepts an award from San Juan Regional Medical Center CEO Steve Altmiller. (photo second from top)

Board member Ed Wood retired after 30 years of service in June 2005 and said his farewells to College staff at a reception in September. He is pictured here with Dr. Spencer and his wife Janet. (photo third from top)

Board member Shane Chance and wife Jennifer. (photo lower left)

building...

building...

San Juan College celebrated the beginning of construction of the \$7.6 million, 32,839-square-foot Learning Commons with a "concrete pouring" ceremony on March 29. Attendees were invited to place their handprints or write an inspirational message in concrete slabs, which will be used in campus landscaping. The center is expected to be complete in December 2005, with move-in over spring break 2006. (lower left)

The 3,000-square-foot addition to San Juan College West in Kirtland started in

February and was completed in August 2005. This \$700,000 project includes two classrooms and a children's reading room.

Phase II of the Outdoor Learning Center project began in October 2004 with construction of three new ballfields and a retention pond. Construction of a 3,000-square-foot greenhouse, landscaping, parking lot, xeriscape demonstration area and renewable energy demonstration area are expected to be finished in the fall 2006. (top left)

San Juan County voters approved a \$10.7 million bond issue in June 2005 that will fund improved parking, a student dining center, health careers wing at the Health and Human Performance Center, the Outdoor Learning Center and Learning Commons Plaza. The community campaign was led by SJC Foundation president Sue Dial.

San Juan College placed among the top 10 mid-size community colleges in the nation for its “digital sophistication” according to the Center for Digital Education and the American Association of Community Colleges (AACC). San Juan College ranked seventh nationally, based on a survey that examined how colleges are using technology to streamline operations and better serve students, faculty and staff. Marina Leight, vice president of the Center for Digital Education, and Dr. Spencer. (top right)

Bringing Good News to Baghdad. Thanks to technology, many miles were erased between a soldier and his family. San Juan College wanted a way to extend the use of teleconferencing equipment into the community. With the assistance of the website for Freedom Calls, enabling soldiers in Iraq to talk with their family members, Sgt. Glen Mortensen was able to get a first glimpse of his granddaughter, Joseleen. (middle right)

Industry leaders throughout the area gathered for the Technology Leadership Conference in June, hosted by the Office of Technology Services. The first event of its kind at San Juan College featured information technology professionals who provided information on topics from network security to overcoming the status quo in implementing new technology. At San Juan College’s first Technology Leadership Conference this summer are Shah Ardalan, SJC vice president for technology services; Russ Griffith, president and CEO of Datatel, Inc.; Dr. Carol Spencer, SJC president; and Tom Huber, president of SunGard Collegis, Inc. (lower right)

9

teaching

A group of San Juan College faculty and students traveled to the Czech Republic and Hungary for 18 days in May as part of the six-credit course “The Central European Experience: A Sense of History and Writing about Place,” which combined history with writing. Among other places, students visited Terezin, a Nazi concentration camp in the Czech Republic, and took a hovercraft ride up the Danube from Budapest to Vienna, where the group then caught an evening train back to Prague. Student writing from the trip will be published in the 2006 edition of *Illumina*, the San Juan College art and literary magazine.

A group of faculty and a student traveled to Cuernavaca, Mexico, June 10-26 for a Spanish language immersion trip, studying

at the Center of Bilingual Multicultural Studies Universidad Internacional. The trip was led by Dr. Judith Palier. The experience so inspired student traveler Tyrell Atchison that he signed up for a nine-month program in Buenos Aires to conduct more intensive Spanish study.

The San Juan College Student Success Center (SSC) earned a College Reading and Learning Association (CRLA) Master

Level accreditation in September of 2004. As of May 2005, 20 of the 39 SSC tutors earned certification from the CRLA. (photo left)

San Juan College in cooperation with San Juan County schools offered the GEAR UP Science Saturday program. GEAR UP (Gaining Early Awareness and Readiness for Undergraduate Programs) is designed to encourage middle school students to pursue a col-

Students in the main square in Prague, Czech Republic, waiting for the astronomical clock to strike. (photo left)

lege education and get them excited about science and technology. Funding came from the New Mexico Space Grant Consortium through NASA. (photo lower left)

Beginning in the 2005 fall semester, the Health Information Technology (HIT) Program will become completely web-based, with the opportunity for students to earn their associate degree in HIT entirely on-line. Judy Sewell, pictured at top right, is a graduate of the HIT program.

The San Juan College Navajo Word Processor version 3.1, developed by computer science programming students, went on sale in December 2004. The complete software package includes a full-featured word processor, four Navajo fonts, English to Navajo dictionary and a Navajo to English dictionary. Pictured at right: Dr. Tim Reeves (middle) with students who developed the software package.

The San Juan College Adult Basic Education program was awarded Program of the Year, and two of its teachers were honored as Teachers of the Year at the second annual New Mexico Adult Education Association and New Mexico Coalition for Literacy Joint Conference. Alan Nelson was recognized as Teacher of the Year in Adult Basic Education/Literacy. Kristen Baker was recognized as Teacher of the Year for English as a Second Language. (photo left)

In July 2005, San Juan College and its Regional Energy Training Center (RETC) received top honors from the U.S. Department of Labor. The RETC received Recognition of Excellence in the "Educating America's 21st Century Workforce" category at the Workforce Innovations 2005 Conference.

Bill Sanders, chair of the DOL Workforce Innovations conference, presented the Recognition of Excellence Award to Dr. Spencer (photo top)

Faculty who traveled to Cuernavaca, Mexico, in the summer 2005: (seated) Terri Reheman, Dr. Callie Vanderbilt, Alexandra Bassett; (standing) trip leader Dr. Judith Palier and Kathleen Chambers. (photo above)

graduating

A total of 603 students graduated in 2004-05. In addition, New Mexico Highlands University graduated 104 students in both bachelor's and master's programs, the University of New Mexico graduated 37 students and New Mexico State University graduated four.

The Automotive Manufacturer's Partnership program and the General Automotive Technology program had a total of 49 graduates from the program in May 2005. The program normally graduates 25 to 30 students.

granting

The Geographic Information Science program (GIS) got a boost this summer with a \$370,969 grant from the National Science Foundation. The grant will allow for training modules to be developed, a mentorship program to be established and curriculum to be kept updated. Funding will also pay for state-of-the-art equipment and computer software. (photo right)

San Juan College received a \$600,000 National Institutes of Health (NIH) grant that will establish a Bridges to the Future program to encourage students from minority populations to pursue education and careers in science. The grant will introduce students to programs in science, build awareness of career opportunities and provide a seamless transition to a four-year institution. (photo right, second down)

The School of Trades and Technology received \$1.1 million to establish a Center for Emerging Technologies (CET) in partnership with the four school districts in San Juan County. The money is part of \$10 million to fund the creation of 18 technical vocational education centers around the state.

San Juan College's EDGE (Educational Dedication and Goal Enhancement) program, for first-generation college students, received a grant from the U.S. Department of Education's Student Support Services Program for \$918,265 over four years. Funds will allow EDGE to continue to serve low-income, disabled and first-generation college students through 2010. The program has had a profound impact on its students, achieving a 90 percent retention rate and a 30 percent graduation rate. (photo right, third down)

San Juan College was awarded a \$400,000 multiyear grant as part of Achieving the Dream: Community Colleges Count, a national initiative to improve student success in community colleges. San Juan College is one of 27 community colleges from five states participating in Achieving the Dream. The grant was awarded by the Lumina Foundation for Education.

Area teachers will be able to take their writing skills, as well as those of their students and peers, to new heights thanks to the Bisti Writing Project and a \$30,000 grant from the National Writing Project.

Bisti Writing Project is a collaboration among San Juan College, the University of New Mexico and the community. (photo bottom left: Dr. Vicki Holmsten, project director)

Thanks to a \$31,388 Clean Energy grant provided by the New Mexico Minerals and Natural Resources Department, students will have an opportunity to learn more about renewable energy as an alternative power source. In addition, the photovoltaic system will provide some of the electricity needed to operate the Outdoor Learning Center. (photo below right, Tom Munson, program director)

awarding

In August 2004, San Juan College presented the Annabelle R. Friddle Award for Faculty Excellence to Vernon Willie, assistant professor of mathematics in the School of Science. He has taught at San Juan College for seven years and was at one time himself a student at the College. (photo immediate right: Dr. Carol Spencer, Vernon Willie and board chair Craig Walling)

Orly Hersh, instructor of English, received the Pepsi Faculty Excellence Award in recognition of her innovative teaching, service to students and positive attitude. (photo middle right)

The Fran Sandoval Staff Excellence Award was presented to Valerie Wheeler. Wheeler has been with San Juan College for 15 years working in various administrative positions. (photo top right)

Student Sally Barker was nominated by Dr. Carol J. Spencer as a candidate for the All-USA and All-State Academic Teams, sponsored by *USA Today*, the American Association of Community Colleges and Phi Theta Kappa International Honor Society. (photo bottom right)

At left: Mathematics professor Gerald Williams was honored with the 2005 Lou and Ruth Allison Faculty Excellence Award at College graduation ceremonies in May. Williams has taught at San Juan College since 1995 in math subjects ranging from basic math to differential equations.

At graduation ceremonies in May, College president Dr. Carol J. Spencer announced the recipients of the Distinguished Teaching Chairs. This award was designed to foster excellence in the classroom and to formally recognize outstanding teachers. English instructor Kimberly Robison received the literacy chair, funded by Citizens Bank. History instructor Dr. David Bramhall and biology instructor Dr. Don Hyder received the general chair, funded by Annabelle Friddle. (photos top right)

San Juan College was one of four colleges selected nationwide to receive a MetLife Foundation Best Practice College Award for 2004-05. The honor, which comes with a cash award of \$10,000, recognizes community colleges for student retention.

For the ninth year, San Juan College honored four of its employees with the President's Mission Award. In January, Dr. Carol Spencer recognized the late Debbie Prell, assistant professor of physics and math, who passed away in August 2005; Linda Harris, administrative assistant in the Office of Marketing and Public Relations; the late Gary Golden, vice president for student services, who passed away in November 2004, represented by his son Eric, wife Kathy Jo and son Greg; and Nick Mrzлак, part-time instructor of Fire Science (seated in front next to Dr. Spencer).

more

Community forums were held in Aztec, Bloomfield, Farmington, Kirtland and Shiprock in January and February 2005 to gather feedback, take the pulse of the community and learn how the College can further invigorate economic development and higher education in San Juan County.

The San Juan College Library sponsored six literary events during the year, including a visit from award-winning New Mexican writer Denise Chávez. (pictured at

left). The library partnered with the Humanities Department, the Honors Committee, Cultures Across Borders, Navajo Preparatory School and the New Mexico

Humanities Council for a full day of workshops and an unforgettable evening performance.

Math and science instructor Debbie Baker-Prell lost her battle with cancer August 7, 2005. She was a tireless and enthusiastic teacher, who shared her love of science with not only college students, but also with middle school students through programs such as GEAR UP and the New Mexico Space Grant Consortium. (photo left)

For the past seven summers, students have participated in the Totah Archaeological Field School, a partnership between the College and Tommy Bolack of the B-Square Ranch. Under the direction of Linda Wheelbarger, students excavated an ancestral Puebloan village located at the base of the Shannon Bluffs. (photo left)

16

San Juan College mourned the loss of friend and colleague Gary Golden, vice president for student services, who died unexpectedly November 25, 2004, from a heart aneurysm. Golden had worked at San Juan College for 14 years and was a strong advocate for students in helping them better their lives. (photo left)

foundation highlights

- Total fund balance grew to over \$16.3 million with total assets of over \$16.8 million
- Endowment fund grew to over \$10.5 million
- Provided \$270,000 in scholarship support
- Gave away 138 computers to San Juan College students
- Co-sponsored the 15th annual Wells Fargo / SJC Foundation Scholarship Scramble
- Sponsored the ninth annual San Juan College Hall of Fame induction ceremonies
- Provided \$348,000 to support College programs
- Provided \$23,000 to support student, faculty and staff awards
- Provided \$18,500 to support special events
- Transferred \$212,000 of in-kind donated personal property to San Juan College
- Provided \$16,000 to support capital improvement projects
- Provided \$18,500 to promote general obligation bond elections
- Secured funding for the Apple Blossom Pow Wow, Community Nursing program, Child and Family Development Center, Daimler Chrysler Automotive program, faculty and staff awards, engineering and math programs, First Tee of San Juan County, Flora Study Project, guest speakers bureau, Geographic Information Science Technology program, herbarium supplies, Health and Human Performance Center equipment, Industrial Process Operator Program, KSJE radio, Project Read, Silhouette Series performances, library, music programs, Nursing program, Renewable Energy program, Regional Energy Training Center programs, Senior Companion program, Student Success Center, Learning Commons construction, TEC student support, Totah Archaeological Field School, theatre programs, Wellness Committee support, and endowed and annual scholarships

Hank Adair of PNM and scholarship recipient Miranda Montano.

Students building **Success**

San Juan College celebrates the successes and accomplishments of students in meeting challenges and overcoming hurdles. Here's a look at just a few of the many who are building their own success.

Brenda Becenti

EARLY CHILDHOOD EDUCATION

Brenda Becenti is an early childhood educator who clearly has a calling to work with young children - especially those with special needs.

As a mother who has children of her own with special needs, she has personal experience with these types of challenges.

Brenda's interest in special education began when she discovered how much her own children benefited

from attending Farmington Special Preschool. Recognizing her talents, teachers there encouraged Brenda to study early childhood education at San Juan College. Now with her associate's degree in hand Brenda is in constant demand to substitute teach at the College's Child and Family Development Center as well as the Farmington Special Preschool.

"Brenda has shown tenderness, understanding and endless patience in guiding children with special needs during her practicum placement," says Judy Hudson, director of Early Childhood Education. "Children are fortunate to have such an informed, strong advocate working with them in the early childhood setting."

Philip Cheasebro

CHORAL MUSIC

Philip Cheasbro's passion for music was sparked at the tender age of six when his mother encouraged him to take piano lessons. His love of music continued to grow throughout grade school and junior high. During his sophomore year of high school, he discovered his vocal talent as a member of the Barbershop Harmony Society. His experiences with the barbershop group and a zeal for music

led him to pursue a degree in music education at San Juan College. He exercises his singing talent as a member of San Juan College's Country Company choral group.

Along with the gift of song, he is known for having a lively sense of humor. Fellow students often recognize him as "the guy not wearing shoes." Philip says he finds them bulky and uncomfortable, but says, "The bill for replacing worn out socks is adding up."

His talent combined with a wide range of interests and playful sense of humor will no doubt serve him well in his chosen career. He plans to graduate from San Juan College with a degree in elementary education and teach secondary or post-secondary music.

Matilda Matchers

COMPUTER SCIENCE – MICROCOMPUTER APPLICATIONS IN BUSINESS

While Matilda Matchers has already earned an associate's degree in accounting from San Juan College, she returned to pursue a second degree – an associate's in microcomputer applications in business.

Matilda has always been fascinated by computers. She is employed full time with the City of

Farmington, ensuring that the computers and programs function properly.

She returned to San Juan College when her job demanded more letter writing and composition skills. In the process, she enrolled in a computer applications class. Her interest in computers was piqued, and she decided to pursue her degree in microcomputer applications in business. The classes she has taken at San Juan College have given her the understanding needed to help facilitate an upgrade of the court computer program at the City of Farmington. Matilda plans to pursue a bachelor's degree in programming.

Erica Sanders

THEATRE

A wife, mother and full-time student, Erica Sanders decided to take on one more full-time job she loves – coordinating costumes for more than 15 theatre productions at San Juan College.

She got hooked on theatre last year when she took Introduction to Theatre to fulfill an arts elective requirement. One of the course requirements was to work on a production. Erica took on the job of costuming the theatre program's production of *The Bald Soprano*. She also coordinated costumes for the 13 plays in Studio Scenes, a festival of one-act plays.

"This was the hardest work I have ever done in my two years at San Juan College but also the most rewarding," she says. Erica also played an integral role in the success of *The Pirates of Penzance*. She recently directed her own play, *The Diary of Adam and Eve*. Erica's love of theatre has her planning to study elementary education to instill a love of theatre in students.

Darren Smith

INFORMATION TECHNOLOGY – NETWORKING EMPHASIS

Darren Smith started writing computer programs at an early age. In the seventh grade he wrote his first program – a haunted house adventure – on a Commodore PET, when BASIC required line numbers. His love of computers didn't stop there. During high school, he wrote and maintained computerized testing software for the school's industrial technology programs. Following high school, he took computer science classes at Yavapai Community College in Prescott, Ariz., and eventually took on a job as a computer operator before receiving a promotion as a systems and network specialist.

Today, as an electronic data processing officer for Citizens Bank, Darren believes in ongoing education to keep up with the continually changing technology. "Even though I'm not seeking a degree, San Juan College has provided me with wonderful opportunities to continue enhancing my skills while advancing my career," he says.

Daniel Standifer

COMPUTER SCIENCE

Daniel Standifer's first interest in computers came in the eighth grade under the guidance of a computer programming

teacher where he designed a fully working McDonald's cash register. His interest in computers and desire to "learn something new" brought Daniel back to San Juan College in 2002 after previously earning an accounting degree in 1998.

He assumed the leadership role for the final development phases of the San Juan College Navajo Word Processor 3.1 program. The software package includes a full-featured word processor, four Navajo fonts, English to Navajo dictionary and Navajo to English dictionary. Since its original release in 1999 there have been version upgrades from 1 to the current ver-

sion 3.1. In the fall of 2004, Daniel's team took over the project, repairing problems and preparing the processor for sale. The final 3.1 version is now available for sale in the College Bookstore, enjoying brisk sales.

"Daniel deserves a great deal of credit for his dedication and the considerable abilities and skills he brought to the project," says Dr. Tim Reeves, professor of computer science.

Daniel works full time as the network administrator at Dial Oil Company, and is pursuing a degree in information technology.

Casey Wade

PSYCHOLOGY

Casey Wade has a devotion to psychology and serves as president of the San Juan College Behavioral Science Club, where he is a leader, guiding students in learning about the application of various behavioral science disciplines. He recently presented a study about an important source of renewable energy to the Rocky

Mountain Psychological Association. At this conference, Casey was one of a select few students representing a community college.

"Casey has shown diligence and aptitude equal to upper division students at the top of their class from major universities," says Dr. Brian Parry, San Juan College psychology instructor.

Casey credits San Juan College for instilling in him a sense of community, leadership and empathy, and teaching him that it is better to serve than to be served. In May 2005, he graduated with honors as a distinguished scholar from San Juan College.

Ian Walker

MATHEMATICS

After almost failing a high school geometry class, Ian Walker now welcomes the challenges of numbers. In fact, Ian enjoys math so much that he has taken almost every math class offered at San Juan College.

Just prior to graduation from San Juan College, Ian excelled in his final math classes, which included Differential Equations and Calculus III. The subject that once was difficult has now become somewhat of a hobby.

Gerald Williams, an assistant professor of math at San Juan College, credits Ian's success to the way his student approaches the subject. "Most people think that math is about solving problems and getting the right answer," Williams says.

"However, communication is another big factor in that you have to be able to share how you solved the problem with others. Ian is able to communicate both verbally and through mathematical writing."

Ian's love of math is sure to serve him well as he plans to continue his education by studying engineering.

Nathaniel Weahkee

BUILDING TRADES

Nathaniel Weahkee currently holds two degrees from San Juan College – a liberal arts degree and a human services degree. A dream of building his own home, and someday his own business, has brought Nathaniel back to San Juan College's Building Trades program.

Nathaniel received his program certificate in May 2005. The

program helped Nathaniel to read and understand blueprints and building instructions from architects and builders while practicing estimating costs and time requirements to finish various projects. Nathaniel hopes to work with a licensed contractor gaining experience in the business. His long term goal is to own a construction company.

Blake Barnett, coordinator for San Juan College Building Trades program, commends Nathaniel's efforts, saying, "Employers are always looking for graduates with specific qualities that are not always easy to find. They want dedication, honesty, dependability, motivation and common sense. Nathaniel is one such person."
